---

Ok we'll do our best to review their QAPP responses before their scheduled Friday morning call, but they missed their deadline and we may need more time.

I also understand we were not provided the Bathymetry specific HASP today. Not sure how hardline EPA wants to be on this, but if not provided today, they technically need to push the start of their Bathy field work to Tuesday.

Scott

Thank you Scott. I got off the call with Ken Tyrrell earlier, the QAPP will come in tomorrow, likely in the afternoon.

Thanks,

Hi Davis.

We went through the HASP RLSO provided Friday 3/2 and they made most of the changes they said they would make. Yellow indicates items pending review of their Field Specific HASP, which they still need to provide.

Two exceptions are noted in RED. One involves having Action Levels above a couple COCs with PELs below the action levels stated and the other was not updating their HASP text to incorporate AED demo/check text at the start of each field event.

These items could easily be addressed during our Friday phone call when we discuss the Surface Water/Sed Trap response to comments.

Let me know if you have any questions.

Scott
